Description :

Spirit Lamp (Product Code: SCL335/66) is a stainless steel alcohol lamp used to give a small, steady flame for gentle heating and for flaming tools in laboratories without a gas supply. It holds 60 ml of fuel, and biology teachers use it for warming food-test tubes, flaming loops and heat-fixing smears on slides. A staple of microbiology lab equipment in India, it is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Spirit lamp
Material	Stainless steel
Capacity	60 ml
Application	Laboratory use
Product code	SCL335/66
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Spirit Lamp Used For?

Spirit lamps burn an alcohol fuel through a wick, giving a cooler and quieter flame than a gas burner. That makes them well suited to warming a test tube of Benedict's reagent in a water-bath set-up, passing an inoculating loop or forceps through the flame before and after handling a culture, and briefly heat-fixing a bacterial smear before staining. Because the lamp is self-contained, it can be placed on any bench, in a field station or in a classroom that has no gas supply, and the 60 ml reservoir suits intermittent heating during a practical.

Refill only when the lamp is out and cool, away from other flames, and wipe away any spilled fuel before lighting. Stand the lamp on a stable, heat-resistant surface, never carry it while lit, and put the flame out by smothering it rather than blowing. The stainless steel body will not shatter if knocked over, which is one reason schools often choose metal lamps for student benches when buying school biology lab equipment.

OEM Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, is the OEM (original equipment manufacturer) of this stainless steel spirit lamp and makes it at its own licensed factory at Saha, Ambala, Haryana, India. Because the lamp comes from the factory rather than a reseller, schools, colleges, dealers and importers deal directly with the maker on price and supply. For spares or extra lamps for a new lab, ask us and the manufacturer itself will respond. More about the company is on our company profile.
