Description :

Plastic Pattern Blocks (Product Code: SLE/MAT/39) is a set of 100 plastic pattern blocks usedto analyse, compare and compose 2-D shapes in primary maths lessons. The blocks come in 6 shapes and 6 colours, and the largest shape measures 2 in wide. The set is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of mathematics lab equipment, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Number of blocks	100
Shapes and colours	6 shapes, 6 colours
Largest shape	2 in wide
Material	Plastic
Topics	Symmetry, area measurement, analysing, comparing and composing 2-D shapes
Product code	SLE/MAT/39
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are Plastic Pattern Blocks Used For?

Pupils place blocks edge to edge to copy and extend patterns, build designs with a line of symmetry, and find how many smaller blocks cover a larger one, which introduces area measurement without formulas. Comparing shapes by their sides and angles, then combining them into new figures, develops the reasoning behind analysing and composing 2-D shapes.

A set of 100 suits a small group or a teacher-led demonstration table, and schools running whole-class lessons can order several sets. Plastic blocks can be washed in mild soapy water and dried before storage, which helps when they are shared across classes. That makes them a practical piece of school laboratory equipment for primary maths rooms.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known by its trading name ScienceLab, is the OEM (original equipment manufacturer) of these Plastic Pattern Blocks. They are made at the company's own licensed factory at Saha, Ambala, Haryana, India, and supplied factory-direct to schools, institutions, dealers and importers. Extra blocks and repeat orders are arranged with the manufacturer itself, so just ask us when your class needs more. Visit the ScienceLab company profile for more.
