Description :

AIDS Virus Chart (Product Code: SCL483/0209) is a laminated wall chart used to teach the structure of HIV, the virus that causes AIDS, and how it weakens the immune system, in school biology and health education classes. At 75 x 100 cm on polyart, it gives teachers a calm, factual reference for a sensitive topic and suits any health education kit for schools. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Chart
Topic	AIDS virus (HIV)
Material	Polyart
Size	75 x 100 cm
Finish	Laminated
Used in	Schools and laboratories
Product code	SCL483/0209
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the AIDS Virus Chart Used For?

In a lesson on viruses, HIV is the standard example of a retrovirus. The particle has an outer envelope taken from the host cell membrane and studded with glycoprotein spikes, and inside it a capsid holding the viral RNA together with the enzyme reverse transcriptase. After entering a helper T cell, the virus copies its RNA into DNA that is built into the cell's own DNA, so the cell makes new viruses and is eventually destroyed. As helper T cells fall in number, the immune system weakens and infections it would normally resist take hold, the condition called AIDS.

Teachers also use the chart as the starting point for the prevention part of the lesson: how HIV is and is not transmitted, why screened blood and sterile needles matter, and how early testing and treatment help people live long lives. Many schools follow it with a simulated HIV testing activity, so students see how an antibody test works without handling any real sample.

OEM Manufacturer

ScienceLab is the trading name of **Jain Scientific Equipments Private Limited**, and the company is the OEM manufacturer of this AIDS virus chart, making it at its own licensed factory at Saha, Ambala, Haryana, India. Schools, NGOs, training centres, dealers and importers buy factory-direct instead of through a chain of traders, and the same team handles repeat orders for further co
