Product Name :

Plastic Weighing Boats

Product Code :

SLE/ME/04

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Plastic Weighing Boats (Product Code: SLE/ME/04) is a polystyrene sample holder used to weigh and transfer powdered and granular samples on laboratory balances in schools, colleges and testing labs. They suit all types of balances, and their smooth surface, rounded corners and corner recesses let samples pour off cleanly with little left behind. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its chemistry lab consumables.

Key Details

Parameter	Detail
Material	Polystyrene
Balance compatibility	Suitable for all types of balances
Surface	Smooth, with rounded corners for easy removal of powderedand granular samples
Pouring	Recesses at the corners for controlled pour-off
Sizes and pack quantity	Not listed in the product description — ask us
Product code	SLE/ME/04
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Plastic Weighing Boats Used For?

A weighing boat sits on the balance pan and holds the sample, so powders and granules never touch the pan and can be carried straight to a beaker or flask. Tare the empty boat, add the sample until the balance shows the target mass, then tip it out using a corner recess to guide the flow. The smooth polystyrene and rounded corners leave very little material clinging behind, which matters when preparing solutions of known concentration.

Because the boats suit electronic, beam and pocket balances alike, one stock serves every weighing station in a laboratory. Polystyrene can be softened by some organic solvents, so check compatibility before weighing solvent-wet samples, and keep boats away from hot plates and open flames.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, supplies Plastic Weighing Boats from Ambala, Haryana, India, as part of its range of laboratory consumables for schools, colleges, testing laboratories, dealers and importers. Buyers can order them together with balances and other measuring items in one enquiry. See the ScienceLab company profile for more about the company.
