Description :

Water Pipe with a Metallic Nozzle (Narrow Opening) (Product Code: SCL-312/054) is a green plastic water pipe with a narrow metal nozzle, used to supply water to apparatus and benches in school physics laboratories. The tubing is lightweight and tough, and resists weathering, tearing, impact and abrasion. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as a practical part of a school lab setup in India.

Key Details

Parameter	Detail
Pipe material	Plastic
Colour	Green
Nozzle	Metallic, narrow opening
Use	Supplying water
Properties	Lightweight and tough; resistant to weathering, tearing, impact and abrasion
Fittings	Suitable for use with push-to-connect fittings
Product code	SCL-312/054
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Water Pipe with Metallic Nozzle Used For?

In the physics lab the pipe carries water from a tap to where it is needed: filling containers and reservoirs, rinsing apparatus, or feeding set-ups that need a steady supply. The narrow metal nozzle concentrates the flow into a thin, faster jet, which helps when water must be directed precisely and shows students that the same flow speeds up through a smaller opening.

Push the pipe fully onto the tap or push-to-connect fitting before opening the tap, turn the water on slowly and keep the nozzle pointed away from electrical apparatus. Drain the pipe after use and coil it loosely; it resists weathering and abrasion, but sharp kinks still restrict the flow.

Supplier

Jain Scientific Equipments Private Limited supplies this water pipe under its ScienceLab trading name from Ambala, Haryana. It is offered alongside the physics apparatus that needs a water supply, so schools can source the pipe with the rest of their lab order instead of from a separate hardware shop. More about the company is on the ScienceLab company profile.

Related Physics Lab Equipment

Items used with a water supply in the lab:

- Resonance Tube Apparatus — apparatus that works with a water column
- Beaker (Glass) — collecting and holding water on the bench
