Description :

Boiling Tube (Product Code: SCL-322/059) is a clear borosilicate glass tube with a roundbottom, used to heat liquids and solids over a flame in school physics and chemistry laboratories. Students use it for melting-point, boiling and heating work, and its glass is both heat resistant and chemical resistant. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India, as part of its borosilicate glassware for Indiaand export.

Specifications

Parameter	Detail
Material	Borosilicate glass
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant
Bottom shape	Round
Colour	Clear
Product code	SCL-322/059
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Boiling Tube Used For?

In physics, boiling tubes hold wax for melting-point and cooling-curve experiments and water for simple boiling observations; in chemistry, they are used to heat solutions, dissolve solids and carry out small reactions. The round bottom spreads heat evenly, and the clear glass lets students watch melting, boiling or colour changes as they happen.

Fill the tube only partly, hold it with a test tube holder at an angle with the mouth pointing away from people, and warm it gradually by moving it through the flame. Let it cool in a rack before washing, since sudden cooling of hot glass can crack it.

OEM Manufacturer

The Boiling Tube is made by Jain Scientific Equipments Private Limited, trading as ScienceLab, which as the OEM manufactures it at its own licensed factory at Saha, Ambala, Haryana, India. Labs and dealers get the glassware straight from the manufacturer, which keeps replacement orders simple when tubes are broken or worn; ask us about quantities. Background on the company is on the ScienceLab company profile.
