Description :

Lid (Having Two Holes) (Product Code: SCL-323/060) is a vessel cover with two openings, used to close a calorimeter or similar vessel while a thermometer and a stirrer pass through it in heat experiments. Physics teachers use it to cut heat loss from the liquid surface during calorimetry and cooling practicals. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, anOEM manufacturer, at its own factory in Ambala, India, for use in school heat experiments.

Key Details

Parameter	Detail
Item	Lid with two holes
Typical use	Covering a calorimeter or similar vessel with a thermometer and stirrer inserted
Material and size	Please confirm with us when ordering
Product code	SCL-323/060
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Lid with Two Holes Used For?

In calorimetry and cooling experiments, heat escapes from an open vessel by convection and evaporation. Covering the vessel reduces that loss, while the two holes let a thermometer and a stirrer pass through so the liquid can be stirred and its temperature read without lifting the cover. This keeps results closer to the expected pattern in a Newton law of cooling apparatus or a method-of-mixtures experiment.

Fit the thermometer through a cork in one hole so its bulb hangs clear of the base, keep the stirrer moving freely in the other, and check that the lid sits flat on the rim before heating or mixing begins.

OEM Manufacturer

Jain Scientific Equipments Private Limited, trading as ScienceLab, is the OEM of this lid and makes it at its own licensed factory at Saha, Ambala, Haryana, India. Schools and dealers ordering heat apparatus can source the lid from the same manufacturer, which keeps replacements simple; ask us about matching sizes.

For institutional and tender vendor registration, the company's details are GSTIN 06AAECJ8618A1ZT and LEI 3358004HRD1JIVXKYX49. See the ScienceLab company profile for more.
