Product Name :

Micropipette Tips

Product Code :

SLE/ME/16

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Micropipette Tips (Product Code: SLE/ME/16) are replacement tips used on micropipettes to take up and dispense measured microlitre volumes in biology, chemistry and biotechnology laboratories. They are listed as replacement tips for the United Micropipettors and are sold in cases of 1,000 tips, a practical quantity for labs that change tips between every sample. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India.

Key Details

Parameter	Detail
Type	Replacement micropipette tips
Intended pipettes	United Micropipettors (as listed)
Packing	Case of 1,000 tips
Product code	SLE/ME/16
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Micropipette Tips Used For?

The tip is the only part of a micropipette that touches the liquid. It holds the measured volume while the pipette body stays clean, and swapping it for a fresh one between samples prevents carry-over from one solution to the next. In practice that means a new tip for each standard in a dilution series, each sample loaded onto a gel and each reagent added to a reaction tube.

Press the pipette shaft firmly into the tip so it seals evenly, then check it sits straight before drawing liquid. Touch the tip to the side of the receiving vessel to release the last drop, and eject used tips straight into a waste container. Keeping unused tips in a closed tip box protects them from dust, which matters for these everyday lab consumables in shared teaching labs.

What to Specify When Ordering

- The make, model and volume range of your micropipettes (these tips are listed for United Micropipettors).
- Number of cases of 1,000 tips.
- Whether you need filtered tips for PCR or aerosol-sensitive work as well.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, supplies Micropipette Tips by the case from Ambala, Haryana, to schools, colleges, research laboratories and dealers in India and international markets. Regular users often set up repeat orders of tips alongside pipettes, tip boxes and tubes so that consumables never run short mid-term. More about the company is on the ScienceLab profile.
