Product Name :

Battery Clip, PP3

Product Code :

SLE/PHY/21

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Battery Clip, PP3 (Product Code: SLE/PHY/21) is a standard snap-on battery connector used to take power from a PP3 battery into simple circuits in school physics and electronics labs. It has 150 mm leads and fits both PP3 batteries and press-stud type battery holders, so one clip style serves both power options on the bench. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as a basic part for any electricity experiment kit a schoolassembles.

Specifications

Parameter	Detail
Type	Standard PP3 battery clip
Lead length	150 mm
Fits	PP3 batteries; press-stud type battery holders
Product code	SLE/PHY/21
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the PP3 Battery Clip Used For?

A PP3 battery has two press-stud terminals of different sizes at one end, and the clip snaps onto them in only one orientation, so the battery cannot be connected the wrong way round at the clip. The 150 mm leads then carry the supply to the rest of the circuit, whether that is a bulb holder, a buzzer, a small motor or a breadboard. The same clip also snaps onto press-stud type battery holders, which lets a class switch between a PP3 battery and a holder of cells without rewiring.

Before wiring, note which lead goes to the positive terminal and keep that polarity throughout the circuit. Never let the two lead ends touch while a battery is attached, as that shorts the battery and heats the wires. Unclip the battery at the end of each lesson so it does not drain in storage, and bend the leads gently so the joints at the clip last longer.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, which supplies the Battery Clip, PP3 from Ambala, Haryana, India. The company sources it as a standard component and ships it with other electricity and circuit items, so a school or dealer can place a single order for the whole circuit list. Ask us about quantities for class kits or for dealer stock. Company information is on the ScienceLab profile page.

Related Physics Lab Equipment

These items complete a simple battery circuit with the PP3 clip:

- Battery Snap with Crocodile Clip — a battery connector with crocodile clips already attached for clip-on wiring.
- Crocodile Clip — for making quick connections at the ends of the leads.
