Product Name:

Product Code:

Rheostat SCL-351/074

Description:

DESCRIPTION:-

- Capacity: 50 ohm
- The brass c p Guide rod carrying contact block is tightened with brass screw.
- Three lock type brass socket terminals with proper insulation are provided.
- One terminals being connected to the sliding contact and other two are contacted to the ends of winding enabling the instrument to be used as rheostat or potentiometer.
- These have double contact system and moves smoothly on the sliding rod.
- Total resistance and maximum current capacity is clearly marked on the slider.
