Description :

Electric Switch (Product Code: SCL-447/120) is a panel-fixing switch used to open and close circuits on physics lab boards, electrical practicals and student projects. It is held in place by aring that screws on, so it can be fitted through a hole in a board or panel and stays securethrough repeated use. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**,Ambala, India, alongside its physics lab instruments for schools and colleges.

Key Details

Parameter	Detail
Type	Electric switch
Fixing	Ring that screws on to hold the switch in place
Finish	Bevelled design
Listed features	Easy to use; easy to install; durable; well designed
Product code	SCL-447/120
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Electric Switch Used For?

A switch lets students control a circuit without pulling out wires, which is quicker and tidier during practicals. The Electric Switch is fitted to circuit boards, model houses, demonstration panels and project enclosures to turn lamps, LEDs, small motors or buzzers on and off. In junior science classes it is also the simplest way to show the difference between an open and a closed circuit.

Fit the switch through a suitably sized hole in the board and tighten its screw-on ring so the body cannot turn in use. Wire it in series with the load, and disconnect the supply before changing any connections. Check the switch's rating with us before using it on anything other than low-voltage lab circuits.

What to Specify When Ordering

- Quantity per bench, demonstration board or model kit.
- The voltage and current your circuit will carry, so we can confirm the switch suits it.
- Whether one way keys, two way keys or knife switches are also needed.

Supplier

ScienceLab is the trading name under which Jain Scientific Equipments Private Limited supplies the Electric Switch from Ambala, Haryana, to schools, colleges, model makers and dealers in India and international markets. Institutions wiring several demonstration boards can order switches together with wire, lamps and power sources. Company details are on the ScienceLab company profile.
