Description :

Tool Kit (Product Code: SCL-461/126) is a set of hand tools and a drill machine used forelectrical works such as installing, wiring and repairing apparatus in school physics labs andworkshops. The kit consists of a plier, a screwdriver and a drill machine together with otheressential tools, so a lab technician has the basics for routine electrical jobs in one place. It issupplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Application	Electrical works
Contents	Plier, screwdriver, drill machine and other essential tools
Product code	SCL-461/126
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Tool Kit Used For?

In a school or college lab, a tool kit is needed whenever apparatus is installed, repaired orrewired. Technicians use the plier to grip, bend and twist conductors, the screwdriver to fixterminals, switches and panels, and the drill machine to make mounting holes for switches,boards and brackets. Keeping these tools together is a basic part of lab equipment maintenance in India's schools and colleges, and avoids searching for tools during practical sessions.

Before any electrical work, switch off and isolate the supply, and confirm with an electric tester that the circuit is dead. Wear eye protection when drilling, clamp small workpieces rather than holding them by hand, and return each tool to the kit after use so nothing goes missing between sessions.

What to Specify When Ordering

- Number of kits, for example one per lab or one per technician.
- A request for the full contents list, since the kit includes other essential tools beyond the plier, screwdriver and drill machine.
- Any extra items, such as an electric tester or wire cutter, to be quoted with the kit.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the Tool Kit from Ambala, Haryana, to schools, colleges, ITIs, training workshops and dealers in India and international markets. Maintenance kits are often ordered at the same time as new apparatus, so the technician can install and look after it from day one. Details of the company are on the ScienceLab company profile.
