Description :

This column scale weighs adults up to 200 kg in 100 g graduations and works out body mass index on its console. A height rod is available with it, so one station gives weight, height and BMI. The low, anti-slip platform is one-piece cast aluminium, and calibration is by push button with a known weight.

Adult height-rod scale specifications

Parameter	Detail
Capacity	200 kg
Graduation	100 g
BMI	Calculated automatically
Weight stabilisation	MotionLock Technology® helps eliminate unsteady weights
Calibration	Push-button, with any known weight over 100 lb (about 45 kg)
Platform	One-piece powder-coated cast aluminium; large, anti-slip, set low for easy access
Column and console	Anodised aluminium; lightweight, quick assembly; washable surface
Height rod	Available with the scale
Product code	SCL241 /039
Minimum order	10 units
Dispatch	Usually within 7 to 10 working days
Supplied by	ScienceLab (Jain Scientific Equipments Pvt Ltd), Ambala, India

Weighing, height and BMI tasks at an adult station

BMI practical. Students read a partner's height from the rod and weight from the platform, then calculate BMI by hand: weight in kilograms divided by the square of height in metres. They compare the hand figure with the console result and repeat the exercise for each member of the group.

Adult nutrition station. After weight and height, the health worker takes mid-upper arm circumference with an adult MUAC tape and waist circumference with a fibreglass tailor's tape. All four figures go on one card, so each visit's results stay together.

Cross-check between scales. Clinics that also keep a mechanical physician beam scale can weigh the same person on both at the start of a session. A clear difference is a p
