Product Name :

Safety Pipet Filler, Silicone

Product Code :

SLE/ME/20

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Safety Pipet Filler, Silicone (Product Code: SLE/ME/20) is a silicone pipet filler used to fill and dispense pipets with one hand in chemistry, biology and teaching laboratories. It adjusts to fit any size of pipet and is highly resistant to organic solvents, since silicone is more chemical resistant and more resilient than PVC or natural rubber. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for safe pipetting in place of mouth suction.

Key Details

Parameter	Detail
Material	Silicone
Operation	Filling and dispensing with one hand
Pipet fit	Adjusts to fit any size pipet
Chemical resistance	Highly resistant to organic solvents
Compared with otherfillers	More chemical resistant and resilient than PVC or natural rubber
Product code	SLE/ME/20
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Silicone Pipet Filler Used For?

Titration practicals, standard-solution preparation and any transfer of a measured volume start with filling a pipet, and this filler lets students do it safely with one hand while the other steadies the flask. Because silicone stands up to organic solvents better than PVC or rubber bulbs, the same filler can move from aqueous acid-base work to solvent-based reagents in organic chemistry classes, which makes it a practical addition to any titration kit for schools in India and abroad.

Hold the pipet close to its upper end and ease it into the filler with a gentle twist so the glass is not strained. Draw liquid a little above the mark, let it down to the line, then dispense into the receiving vessel. Keep liquid out of the filler itself, rinse the outside if it gets splashed, and store it where it will not be squashed under heavier apparatus.

Supplier

ScienceLab, the business name of Jain Scientific Equipments Private Limited in Ambala, Haryana, supplies the Safety Pipet Filler, Silicone to schools, colleges, university departments and dealers in India and international markets. It is usually ordered in class sets together with pipets and stands so every bench can pipette safely. Company information is on the ScienceLab profile.
