Description :

Plastic Moulds (Product Code: SLE/MAT/68) is a set of 12 hollow plastic shape moulds usedwith clay so that children can make various geometrical figures in pre-primary and primary maths lessons. Provided with clay and listed at 20 cm length and 25 cm width, the set turns shape learning into a hands-on, enjoyable activity and fits neatly into a preschool kit or early maths corner. **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, makes it atits own factory in Ambala, India.

Specifications

Parameter	Detail
Set contents	12 hollow shapes with clay
Material	Plastic moulds
Length	20 cm
Width	25 cm
Purpose	Making various geometrical figures while learning through play
Product code	SLE/MAT/68
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are Plastic Moulds Used For?

Children press clay into each hollow mould, ease it out and hold a finished geometrical figure they have made themselves. The teacher then asks them to name the shape, count its sides and corners, and compare it with the shapes their neighbours have made, so vocabulary and observation grow together.

Once several shapes are ready, pupils can arrange them into pictures, patterns or size orders on the desk. Press the clay in firmly and remove it gently so edges stay sharp, and keep the clay covered between lessons so it stays workable. The moulds suit any school lab setup in India that includes an early-years maths or activity corner.

OEM Manufacturer

Plastic Moulds are made by Jain Scientific Equipments Private Limited, operating as ScienceLab, which is the OEM (original equipment manufacturer) for this set. Manufacturing is carried out at the company's own licensed factory at Saha, Ambala, Haryana, India, and schools, colleges, dealers and importers buy direct from the factory rather than through traders. Repeat orders and replacement moulds can be discussed with the manufacturer — just ask. Find out more on our company profile.
