Product Name :

Fraction Dice

Product Code :

SLE/MAT/73

Description :

Fraction Dice (Product Code: SLE/MAT/73) is a set of six small dice used to teach fractional relationships through roll-and-compare games in school maths lessons. Primary and middle-school teachers use it on its own or with existing fraction kits, and the set covers the fractions 1/2, 1/3, 1/4, 1/5, 1/6, 1/8 and 1/12 on dice 5/8 inch (about 16 mm) in size. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Dice per set	6
Die size	5/8 inch (about 16 mm)
Fractions covered	1/2, 1/3, 1/4, 1/5, 1/6, 1/8 and 1/12
Teaching use	Fractional relationships; add-on for existing kits that need avariety of fractions
Product code	SLE/MAT/73
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are Fraction Dice Used For?

Rolling a fraction instead of a whole number gives children a quick reason to compare and order fractions. In a simple two-player game, each pupil rolls, the pair decide whose fraction is larger and explain why — for instance, that one third beats one quarter because the whole is shared among fewer parts. Older pupils can roll two dice and add, subtract or find a common denominator for the results.

The dice also slot into fraction kits a school already owns whenever an activity needs a random choice of fraction, turning a fraction-wall or fraction-circle lesson into a game. Working in small groups keeps every child rolling and reasoning, which is why many schools keep a few sets with their mathematics lab equipment.

What to Specify When Ordering

- Number of sets required (each set holds 6 dice).
- Whether the dice will be used alone or with an existing fraction kit, so the fractions suit your activities.
- Any other fraction or probability aids to be quoted on the same order.
