Product Name :

Adjustable Clamp Holder

Product Code :

SLE/CH/09

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Adjustable Clamp Holder (Product Code: SLE/CH/09) is the connecting piece that fixes a laboratory clamp to a support rod of up to 5/8 in diameter, and it can be swivelled and locked at any angle so the clamp can point up, down or sideways as the set-up demands. It has an enamel finish and is tightened by hand with plastic thumb screws, so no tools are needed at the bench. Made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, it is a basic building block of school chemistry lab equipment in India and of college and research support stands.

Specifications

Parameter	Detail
Rod size	For rods up to 5/8 in diameter
Adjustment	Swivels and locks to any angle
Finish	Enamel
Tightening	Plastic thumb screws

Typical Use

On a retort stand, one side of the holder grips the upright rod and the other holds the shaft of a clamp, a ring or a burette clamp. Slide it to the working height, tighten the rod thumb screw, insert the clamp shaft, then swivel the clamp to the angle you need and lock it. The ability to set any angle helps with condensers that must slope, funnels that need to sit over a receiving flask, or clamps that must reach across to a second stand.

Plastic thumb screws are comfortable to turn and allow quick changes between experiments; tighten them firmly but without excessive force. Before hanging glassware, give the clamp a gentle tug to confirm it will not slip. The enamel finish protects the body from routine splashes — wipe it dry after use, and replace any holder whose thumb screws no longer hold, since a slipping clamp is a common cause of broken glass.

Manufacturer

Jain Scientific Equipments Private Limited trades as ScienceLab and manufactures laboratory apparatus in Ambala, Haryana. For institutions that need vendor registration details, the company's GSTIN is 06AAECJ8618A1ZT and its Legal Entity Identifier is 3358004HRD1JIVXKYX49. Company information is on the profile page.

Related Chemistry Lab Equipment

Clamps and stands this holder connects together:

- Retort Stand — provides the upright rod the holder grips.
- Three Prong Swivel Clamp — a round-object clamp to mount in the holder.
- Retort Clamp Three Finger — a standard clamp for flasks and tubes.
- Burette Clamp, Die Cast – Double Clamp — for titration set-ups on the same stand.
