Description :

Bottle Reagent, W.M. Glass (Product Code: SLE/CH/34) is a wide-mouth glass reagent bottle closed with a dustproof flat stopper of glass or polythene. The wide mouth makes it easy to scoop out crystals, powders and granules, so it is the standard container for solid reagents on the chemistry shelf. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory glassware manufacturer supplying schools, colleges and testing labs.

Specifications

Parameter	Detail
Body	Glass
Mouth	Wide mouth (W.M.)
Stopper	Dustproof flat stopper, glass or polythene
Capacity	60 ml; 125 ml; 250 ml; 500 ml; 1000 ml

Typical Use

A row of these bottles typically holds the solid salts, metal pieces and powders students drawfrom during salt analysis and preparation practicals, with each bottle labelled on the front and theflat stopper keeping dust and moisture out between lessons. Small 60 ml and 125 ml bottles are practical for the reagent set on each bench, while the 500 ml and 1000 ml sizes serve as stock containers in the prep room.

Use a clean, dry spatula for each reagent so that samples are not cross-contaminated, and put the stopper back straight away. A glass stopper suits most dry solids; a polythene stopper is the better choice for substances that tend to make a glass stopper stick, such as alkalis. For substances affected by light, choose the amber version of this bottle instead.

Manufacturer

Operating as ScienceLab, Jain Scientific Equipments Private Limited produces glassware, plasticware and laboratory apparatus at Ambala in Haryana. The company profile explains who we are and what we make.

Related Chemistry Lab Equipment

Items that complete a reagent shelf built around wide-mouth bottles:

- Bottle Reagent, W.M. Glass Amber Colour — the amber version for light-sensitive solids.
- Reagent Bottle, Narrow Mouth — better suited to liquid reagents.
- Spatula, Spoon End — scoops solids out through the wide mouth.
- Label Book Sticker Type — for marking each bottle's contents.
- Bottle Brush — cleans the inside before a bottle is reused.
