Description :

Aspirator Polythene (Product Code: SLE/CH/37) is a rigid, jerry can type polythene container with a plastic screw cap and a stopcock outlet, used to store water or solutions and run them offat the bench. It gives prep rooms, field stations and student labs a lightweight dispenser that willnot shatter if it is knocked over. The aspirator is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a chemistry lab instruments supplier to schools and colleges.

Key Details

Parameter	Detail
Type	Aspirator, jerry can type
Material	Polythene, rigid body
Closure	Plastic screw cap
Outlet	Stopcock
Purpose	Storing and dispensing water and laboratory solutions
Capacity	Please confirm on enquiry

Typical Use

The jerry can shape stacks neatly on a shelf and is easy to carry by hand, so the aspirator is often filled at a central water still and moved to wherever students are working. Placed at the edge of a bench, it lets them run off distilled water, dilute acids, buffers or washing solutions through the stopcock in controlled amounts. It is also handy on outdoor or field practicals where a glass bottle would be at risk of breaking. As a school laboratory equipment supplier in India, ScienceLab recommends it for junior classes, where durability matters most.

Keep the screw cap slightly open, or remove it, while dispensing so air can enter and the flow stays smooth. Rinse the container with some of the new solution before refilling, label the contents on the side, and flush the stopcock with clean water when changing from one solution to another.

Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597), headquartered in Ambala, Haryana. The company manufactures at its licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala (Factory Licence AMB-ONLINE-CHD-J-414). See our company profile for details.
