Description :

Brush Burette (Product Code: SLE/CH/45) is a long cleaning brush with a nylon bristle end mounted on an iron wire handle, 900 mm in overall length, so it can be passed down the full bore of a burette from the open top. Lab assistants, teachers and students use it to loosen residue and stubborn films from the inside of burettes before rinsing and refilling them for the next titration. Itis supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, which acts as asupplier of chemistry consumables and school chemistry lab equipment in India and for overseas laboratories.

Specifications

Parameter	Detail
Type	Burette cleaning brush
Bristles	Nylon, forming the bristle end
Handle	Iron wire, with the bristle end mounted on it
Overall length	900 mm
Suitable for	Cleaning the inside of burettes and similar long, narrow glass tubes

Typical Use

A burette that is not properly clean holds droplets on its inner wall, which spoils the meniscus reading and the accuracy of a titration. After a practical, drain the burette, fill it partly with warm water and a little laboratory detergent, and slide the brush in from the top. Work it gently up and down along the graduated section, then rinse several times with tap water and finally with distilled water. When water drains from the wall in an even film without forming beads, the burette is ready to be rinsed with titrant and used again.

The long wire handle lets you reach the lower end without forcing the brush, but stop short of the stopcock and jet so the wire tip does not scratch the bore or dislodge a plug. In busy school titration sessions it helps to keep one brush beside each sink, and to hang it bristle-end down after use so water drains away from the wire.

Supplier

Jain Scientific Equipments Private Limited trades as ScienceLab from Ambala, Haryana, and supplies cleaning brushes and other consumables alongside the laboratory apparatus it manufactures for schools, colleges and institutes. Institutional and tender buyers who need vendor registration details can use GSTIN 06AAECJ8618A1ZT and LEI 3358004HRD1JIVXKYX49. Read more on the company profile.
