# Description :

**MCT Twin Rack** (Product Code: SLE/CH/69) is a two-sided rack for microcentrifuge tubes (MCTs): one face holds 0.5 ml tubes and the other holds 1.5 ml tubes, with 108 holes on each side. An alphanumeric index on each face of the base identifies every position, and a transparent top gives a clear view while protecting the stored tubes. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for molecular biology, biotechnology and clinical teaching labs that source lab plastic ware and chemistry lab equipment in India, and for international markets.

## Specifications

| Parameter | Detail |
|---|---|
| Capacity | Rack for 0.5 ml and 1.5 ml MCTs |
| Holes | 108 on each side — one side for 0.5 ml, the other for 1.5 ml MCTs |
| Design | Twin purpose rack |
| Position marking | Unique alphanumeric index on each face of the base |
| Cover | Transparent top, for viewing and protecting stored tubes |

## Typical Use

During DNA extraction, enzyme digests or sample aliquoting, tubes move constantly between the bench, a laboratory centrifuge and the freezer. Keeping them in an indexed rack means each sample has a recorded address — for example a row letter and column number — so nothing is mixed up when the lids all look the same. When the day's work switches from 1.5 ml tubes to smaller 0.5 ml tubes, simply turn the rack over instead of reaching for a second rack.

With the transparent top in place, tubes can be checked for labels and volumes without being lifted out, and they stay covered while waiting for the next step. Note the index position of each sample in the lab notebook before loading, and keep the rack level when moving it so open tubes do not spill.

## Manufacturer

ScienceLab is the trading name of **Jain Scientific Equipments Private Limited**, an Ambala, Haryana manufacturer of laboratory plasticware, racks and teaching apparatus. For institutional buyers completing vendor forms, the company's GSTIN is 06AAECJ8618A1ZT and its Legal Entity Identifier (LEI) is 3358004HRD1JIVXKYX49. See our company profile for more.

## Related Laboratory Equipment

Items used with this rack in microcentrifuge-tube workflows:

- Micro Centrifuge Tube, 1.5ml — tubes for the 1.5 ml side of the rack
- Micro Centrifuge — spins the tubes between preparation steps
