Description :

Bench Stopwatch (Product Code: SLE/ME/42) is a simple 1/100 second stopclock used to time experiments, practical sessions and classroom activities on school and college laboratory benches. As well as counting up to 24 hours, it works as a clock with calendar and alarm, all operated with just three buttons in a white case. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, with an R6 battery included, as part of its educational lab equipment for India and overseas buyers.

Specifications

Parameter	Detail
Resolution	1/100 second
Counting range	Up to 24 hours
Timing function	Lap facility
Other functions	Clock with calendar, and alarm
Buttons	Three: mode; split/lap/reset; start/stop
Case	White
Battery	R6, included
Size	L120 × W100 × H45 mm
Product code	SLE/ME/42
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Bench Stopwatch Used For?

The Bench Stopwatch suits any practical where a group needs to share one clearly placed timer: timing a reaction until a solution turns cloudy, recording how long a candle burns under a jar, or noting the interval between readings in osmosis and rate-of-cooling experiments. Its 24-hour count also covers overnight or all-day investigations without restarting the timer.

Between experiments, the clock-and-calendar mode keeps the bench useful as a lab clock, and the alarm can remind students when the next reading is due. Keep it away from water baths and sinks, and replace the R6 battery when the display begins to fade.

Supplier

Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala, Haryana, supplies the Bench Stopwatch to schools, colleges, coaching institutes and dealers. It is usually requested together with other timing and measuring instruments, and all of these can be included on the same quotation. Company background is available on the ScienceLab company profile.
