Product Name :

Human Joint Models

Product Code :

SLE/A/02

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Human Joint Models (Product Code: SLE/A/02) are life-sized plastic replicas of human joints used to give students hands-on practice in joint anatomy in school, college and nursing laboratories. Each labelled model shows the major bones and bone structures along with many important tendons and ligaments, and comes with a numbered, laminated key. They are made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of anatomicalmodels, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Material	Plastic
Scale	Life-sized replicas of human joints
Structures shown	Major bones and bone structures, plus many important tendons and ligaments
Labelling	All labelled, with a numbered, laminated key
Purpose	Hands-on learning about joints
Product code	SLE/A/02
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are the Human Joint Models Used For?

Joints are easier to understand when students can hold them. With these replicas a class can look at how the bone ends are shaped to fit together, where the ligaments run to hold the joint stable, and where tendons cross the joint to move it. The numbered key turns each model into a self-check exercise: students name the numbered structures first, then confirm their answers against the laminated sheet.

Teachers often set the models out as a station activity, with small groups rotating between joints and recording the bones, ligaments and tendons they find. This hands-on approach suits school biology lab equipment in India as well as introductory anatomy in nursing and physiotherapy programmes.

OEM Manufacturer

The Human Joint Models are manufactured by **Jain Scientific Equipments Private Limited**, trading as ScienceLab, which acts as OEM and makes them at its own licensed factory at Saha, Ambala, Haryana, India. Buying from the factory means the models and their keys come from one source, and repeat orders for additional labs are handled by the manufacturer itself. See our company profile.
