Protection feature	Steam barrier for added protection
Temperature rating	Not listed — ask us if the glove is for high-temperature equipment
Product code	SLE/G/06
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Single Oven Glove Used For?

A single oven glove leaves the other hand free, which is handy for quick jobs: holding a hot saucepan handle while stirring, pulling out an oven shelf, lifting the lid of a steaming pot or steadying a tray while the free hand closes the oven door. The steam barrier helps when hot vapour rises from a pan or dish, and the thick cotton towelling adds a cushion between the hand and the hot surface.

Home-science and catering teachers usually issue one single glove per cooking station, so each student group can handle cookware safely during practicals. Because a single glove is compact, it hangs easily on a hook beside the stove. Wash it regularly and never use it wet, as moisture lets heat through quickly. Schools equipping food labs through a school lab equipment supplier in India commonly pair it with a double oven glove for larger trays.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, supplies this single oven glove to schools, colleges, catering institutes, hostels and distributors. It can be ordered in the same enquiry as other gloves, aprons and kitchen-lab items. Visit the ScienceLab profile for company details.
