Abrasion resistance (as listed)	EN level 4
Cut resistance (as listed)	EN level 1
Applications	Assembly of small pieces in industries, in environments that present a certain degree of dirt
Product code	SLE/G/16
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Ultra Light Weight Black Gloves Used For?

These gloves are made for fiddly hand work: assembling small components, fitting screws and clips on training kits, sorting parts in a store and light maintenance in electronics or mechanical workshops. The black colour hides the dust and grime of a working bench, which is why the listing points to environments with a certain degree of dirt.

The thin polyurethane coating keeps fingertip feel, so small parts can be picked up without taking the gloves off. With a cut level of only 1, they are not meant for blades or sharp sheet metal. Replace a pair once the coating wears through at the fingertips.

Supplier

This glove reaches buyers through ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana. It is a sourced third-party product (listed as Sensilite), supplied to technical institutes, electronics and assembly workshops and dealers in India and international markets.
