Description :

Human Ear Model (Product Code: SLE/A/13) is a one-piece ear enlarged to 1-1/2 times life size, showing external and internal structures together with the major blood vessels that supply them. With no loose parts to lose, it is a practical ear model for anatomy lab use in India, where the same model may pass through many classes in a week. Science teachers, audiology and ENT nursing tutors and physiology lecturers use it to explain hearing and balance, and it is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)** in Ambala.

Specifications

Parameter	Detail
Scale	1-1/2x life size
Size (with base)	16.5 x 13 x 13 cm
Construction	1-piece model, enlarged to show greater detail in internal structures
Vasculature	Major vasculature included
Key	Numbered key identifying 21 external and internal structures

Typical Use

The model is typically used to trace the path of sound: students start at the outer ear, follow the canal inward and then work through the internal structures while the teacher explains how vibrations are converted into nerve signals. Because the numbered key covers both external and internal structures, a worksheet can ask learners to sort the 21 points into outer, middle and inner ear groups, which reinforces the three-part division that exam questions rely on.

The included vasculature is useful in nursing and allied health classes when discussing ear infections and why inflammation in this region is taken seriously. Its single-piece construction makes it well suited to open display in a biology lab, as there are no removable parts to go missing between classes. A soft brush keeps dust out of the recesses.

Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, an Ambala, Haryana company incorporated under CIN U29309HR2020PTC087597. Its anatomy models are produced at the company's licensed factory in the HSIIDC Industrial Area, Saha, Ambala, which holds Factory Licence AMB-ONLINE-CHD-J-414. The company profile has further details.

Related Human Models
