Description :

Gloves, Ultra Light Weight, White (Product Code: SLE/G/17) is a white polyurethane-coated glove used for assembling small pieces and handling finished components where fine finger control matters. Its elastic nylon liner and thin coating give good abrasion resistance, listed at EN level 4, with a very high level of dexterity, while cut resistance is listed at EN level 1. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India, for workshops and technical labs.

Specifications

Parameter	Detail
Colour	White
Weight class	Ultra-lightweight
Coating	Polyurethane, for hand protection in lightweight applications
Liner	Elastic nylon
Abrasion resistance (as listed)	EN level 4
Cut resistance (as listed)	EN level 1
Dexterity	Very high, for intricate and delicate tasks
Applications	Assembly of small pieces in industries
Product code	SLE/G/17
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Ultra Light Weight White Gloves Used For?

White coated gloves belong on clean assembly benches: fitting small parts into instruments, putting together electronic kits and models, and handling finished or polished components that should not pick up fingerprints. Because the glove is white, it shows at a glance when it has become soiled and needs changing.

Wash and dry hands before putting the gloves on, and keep spare pairs in a clean, dry place so they stay white. For greasy or dusty jobs the black version is the better pick. The listed cut level of 1 means these gloves are not intended for sharp edges or blades.

Supplier

Jain Scientific Equipments Private Limited trades as ScienceLab and supplies this white coated glove from Ambala, Haryana. We source it for instrument-assembly benches, electronics labs and technical colleges, and dealers can order it for resale in India and international markets. Company details are on the ScienceLab profile page.
