Product Name :

Gloves, Welding

Product Code :

SLE/G/18

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Gloves, Welding (Product Code: SLE/G/18) is a leather welder's glove used to protect the hands and forearms during welding and metal fabrication in workshops and engineering labs. Made from green leather with gold stitching, it has a reinforced palm strip for higher durability and a 40 cm length that adds forearm protection. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for workshop and vocational training use.

Specifications

Parameter	Detail
Type	Leather welders glove
Leather and stitching	Green leather, gold stitched
Palm	Reinforced palm strip for higher durability and protection levels
Length	40 cm, for additional forearm protection
Applications	Metal fabrication, welding
Product code	SLE/G/18
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Welding Gloves Used For?

Welding gloves are standard kit for welding practicals in industrial training institutes, polytechnics and engineering workshops, and for fabrication jobs such as cutting, grinding and fitting metal parts. The 40 cm length closes the gap between glove and sleeve, where sparks and spatter tend to land, and the reinforced palm strip takes the wear from gripping the torch, electrode holder and workpiece.

Keep the gloves dry, because damp leather is a poor choice around electric welding. Use tongs or pliers for freshly welded parts rather than holding hot metal, and check the stitching and palm for burns or holes before each session. Wear them with suitable eye and face protection and an apron.

Supplier

ScienceLab is the name under which Jain Scientific Equipments Private Limited of Ambala, Haryana, serves its customers. The company supplies these leather welding gloves alongside the arc, MIG and spot welding machines in its workshop range, so a fabrication lab can source machines and protective gloves from one supplier. Buyers across India and international markets can read about us on the company profile.
