Features	Waterproof; barrier performance; listed to guard against cross infection
Colour	White, with blue adhesive tape
Size	L/XL
Product code	SLE/SLC/05
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Protective Coveralls Used For?

Protective coveralls are worn when front, back, arm and leg coverage is needed in a single garment — for example in isolation areas, while handling specimens, or when cleaning surfaces after a spill. Pulling one suit over normal clothing is quicker than layering a gown, sleeves and trousers.

The breathable film is the feature to note on this model: it keeps the waterproof surface while letting some body moisture escape, which makes longer wear more comfortable than a solid film. Buyers who stock protective wear through a laboratory equipment supplier in India often pair these coveralls with goggles and heavy-duty gloves for clean-up tasks.

Supplier

ScienceLab is the brand under which Jain Scientific Equipments Private Limited, Ambala, Haryana, supplies Protective Coveralls to hospitals, clinical and research laboratories, colleges and dealers across India and international markets. The coveralls are a sourced line within our Safety Lab Coat range; ask us for the details of the batch you are quoted. Our company profile explains who we are.
