Description :

3B Human Muscular Male and Female Model (Product Code: SLE/A/26) is a half life-size dissectible figure that lets one model serve for both sexes: its male and female genital organs are interchangeable, so a single figure can support lessons on either reproductive anatomy. The figure maps superficial and deep muscle layers together with blood vessels, nerves and internal organs, which makes it a practical human body model kit in India for medical, nursing, physiotherapy and senior biology classrooms. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Dissectible muscular figure with male and female genital organs
Scale	1/2× life size
Height	84 cm tall
Number of parts	Dissectible into 33 parts
Structures shown	Superficial and deep muscles, blood vessels and nerves, internal organs
Internal organs	Can be partially dissected
Genital organs	Male and female genital organs are interchangeable
Mounting	On stand with base

Typical Use

In a gross-anatomy or kinesiology session the instructor can begin with the surface musculature, naming muscles region by region and tracing where they attach, then lift away parts to expose the deeper layer and the organs beneath. Because the figure stands 84 cm tall on its own stand and base, it sits comfortably on a demonstration bench where a small group can gather round and point to structures while blood vessels and nerves are followed from one region to the next.

Swapping the genital organs lets the same figure cover male and female reproductive anatomy, which saves bench space in departments that would otherwise keep two separate figures. This makes it a flexible choice among biology teaching aids in India for institutes that teach both school and college levels. A practical habit: lay removed parts on a soft cloth in the order they came off, and count them back against the 33-part total before the model goes back into storage.

Supplier

This figure is supplied by **Jain Scientific Equipments Private Limited**, the Ambala, Haryana company that trades under the name **ScienceLab** and equips schools, colleges and training institutes in India and international markets. Because the product name carries the 3B designation, please ask us to confirm brand and origin details when you request a quotation. Background on the company is available on our company profile.
