Product Name :

Human Skin with Burn Pathologies Model

Product Code :

SLE/A/42

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Human Skin with Burn Pathologies Model (Product Code: SLE/A/42) is an anatomical teaching model of human skin designed to illustrate how burns damage the skin. It gives nursing, paramedical, first-aid and dermatology instructors a physical reference for discussing burn injuries, which are difficult to teach from photographs alone. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for colleges and schools looking for school biology lab equipment in India and for clinical-skills teaching. Because the detailed specification for this listing is being reviewed, please confirm scale, size, mounting and the pathologies represented with us before ordering.

Key Details

Parameter	Detail
Type	Anatomical teaching model of human skin
Purpose	Illustrating burn pathologies of the skin
Supplied as	Single teaching model; confirm current specification on enquiry
Suitable for	Nursing, paramedical, first-aid, dermatology and senior biology teaching

Typical Use

Burn care is usually taught by first reviewing healthy skin and then showing how heat, chemicals or electricity destroy tissue to different depths. A burn pathology model supports that second step: instructors can point to the damaged areas while explaining how depth of injury relates to pain, blistering, healing time and the need for specialist care. Placing it next to a normal skin section model makes the contrast between healthy and injured tissue clear.

In first-aid and emergency-care courses the model helps learners understand why prompt cooling, covering and referral matter, while nursing students use it to link wound assessment with the underlying skin layers. Ask us which burn stages are shown so you can align the model with your syllabus before purchase.

Manufacturer

Jain Scientific Equipments Private Limited, known to customers as **ScienceLab**, is an Ambala, Haryana company making models and laboratory equipment for education and training in India and international markets. Our team can answer detailed questions about this model; company background is on our company profile.
