Description :

Human Skeleton Storage Case, Black Plastic (Product Code: SLE/A/56) is a closable black plastic carrying case used to store and move loose bones, skeleton parts and other laboratory materials in biology and anatomy departments. It measures 23" L x 16" W x 10" H and has a carrying handle and a hinged lid that shuts with a snap fastener. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, among its lab equipment accessories for tidy anatomy storerooms.

Specifications

Type	Storage and carrying case
Material	Black plastic
Size	23" L x 16" W x 10" H
Lid	Hinged, with snap fastener
Carrying	Carrying handle
Also suitable for	Storing other laboratory materials
Product code	SLE/A/56
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Human Skeleton Storage Case Used For?

Loose bones and partial skeleton sets are easily scattered or chipped when they sit on open shelves. A closed case keeps a set together, protects it from dust and makes it simple to carry from the storeroom to the practical bench and back. Given its 23-inch length, the case is meant for loose bones, partial sets or smaller models rather than a fully assembled standing skeleton, so check the fit of your particular set with us before ordering.

Teachers who run bone-identification practicals often keep one case per student group, label the outside and check the contents against a list at the end of each session. Close the lid until the snap fastener engages before lifting by the handle, avoid stacking heavy items on the lid, and wipe the case inside and out with a damp cloth when it needs cleaning. When it is not holding bones, it works as a general box for moving models, specimens or small apparatus.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, supplies this black plastic storage case alongside its anatomy range, so a department can order bone models and somewhere to keep them in a single enquiry. The company sources the case for schools, colleges, dealers and importers in India and international markets and can pack it in the same consignment as the models it will hold.
