Description :

Female Pelvis with Organs (Product Code: SLE/A/61) combines a life-size skeleton of the complete female pelvis with the ovaries, uterus, urinary bladder and rectum in their natural positions, so the bony ring and the organs it protects can be studied together. Midwifery, nursing, gynaecology and anatomy teachers use it to explain the pelvic floor and the perineal region,which are hard to visualise from diagrams alone. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, an anatomical models manufacturer serving schools, colleges and medical institutes.

Specifications

Parameter	Detail
Scale	Life-size skeleton of a complete female human pelvis
Organs included	Ovaries, uterus, urinary bladder and rectum
Pelvic floor	Muscular and urogenital features shown in great detail
Perineal region	Structures especially well rendered and numbered
Key	Included, with 26 identified structures
Size	26 x 17 x 17 cm

Typical Use

Because the organs sit inside a life-size bony pelvis, students can see how the bladder lies in front of the uterus and the rectum behind it, and how the pelvic floor muscles close the outlet from below. The numbered perineal structures and the 26-point key make the model well suited to identification tests: the tutor calls out a number and students name the structure, or the reverse.

In midwifery and obstetric nursing courses it supports discussion of pelvic floor support, continence and the effects of childbirth on the perineum, while general anatomy classes use it to link the reproductive, urinary and digestive systems in one region. As a human body model for small-group work it can be passed between benches; hold it by the bony pelvis rather than the organs, and wipe it with a slightly damp cloth when needed.

Manufacturer

ScienceLab is the trading name under which Jain Scientific Equipments Private Limited makes and ships teaching models from its base in Ambala, Haryana. Institutions that want to know more about the company before placing an order can read the ScienceLab company profile.

Related Human Models

For a complete pelvic and reproductive anatomy set, buyers often add:

- Female Half Pelvis Model — a sectioned view that complements the whole-pelvis presentation
- elvic
- ment
