Description :

Pyrex Beaker Set of 5 (Product Code: SLE/GB/04) groups five Pyrex glass beakers into one pack for general laboratory work such as mixing, heating and cooling solutions. Every beaker carries a single metric scale printed in white enamel and an extra-large marking spot, so the set is easy to label and read at a glance on a busy practical bench. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, to schools, colleges and lab stores that want a lab glassware supplier in India able to combine glass and apparatus in one order.

Key Details

Parameter	Detail
Supplied as	Set of 5 beakers
Material	Pyrex glass
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant
Scale	Single graduated metric scale with white enamel graduations; approximate, not intended for accurate liquid measurement
Labelling	Extra-large marking spot on each beaker
Suitable for	Mixing, heating and cooling in general laboratory use
Capacities in the set	Confirmed on quotation — please ask before ordering

Typical Use

A five-beaker pack works well as a starter kit for a new practical bench or as a replacement pack when individual beakers break over a term. In a single experiment a teacher can assign one beaker to each stage — dissolving a solid, heating the solution, cooling it for crystals, holding rinse water and collecting waste — and write the stage on each marking spot so students do not mix them up. This makes the set useful chemistry lab equipment for school labs in India where several groups share the same bench.

Heat the beakers gradually on a hot plate or on a gauze over a burner, and let hot glass cool before washing it in cold water. Since the enamel scale is only approximate, measure reagents with a cylinder or pipette and use the beaker markings as a rough level guide.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, which supplies this Pyrex beaker set as part of a wider glassware and apparatus offer for teaching and testing laboratories. Read more on our company profile.
