Description :

Horizontally Sectioned Model of the Human Head (Product Code: SLE/A/69) is a life-size head cut into 10 horizontal sections, used to teach sectional anatomy in the same plane as CT and MR images in radiography, imaging-technology and medical courses. Mounted on a base and measuring 34 x 46 x 30 cm, it lets students match scan slices to real three-dimensionalstructures. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM laboratoryequipment manufacturer in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Type	Horizontally sectioned human head model
Scale	Life size
Number of sections	10 horizontal sections
Section plane	Horizontal cross sections oriented in the usual plane for CT and MR imaging
Mounting	Mounted on a base
Size	34 x 46 x 30 cm
Product code	SLE/A/69
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Horizontally Sectioned Head Model Used For?

Students learning to read head CT or MRI often struggle to picture where a grey shape on the screen sits inside the skull. With this model, the tutor projects a scan slice and asks the group to find the matching level on the physical sections, then identify the same structures in both. Working down through the 10 slices builds the habit of reading sectional images from top to bottom in a consistent order.

The model also supports conventional anatomy teaching: comparing neighbouring slices shows how the brain, the air spaces and the soft tissues change from one level to the next. Because it sits on a base, it can stay on a demonstration bench in a radiology or anatomy department for self-study between lectures, which makes it practical biology lab equipment in India at pre-university level as well.

OEM Manufacturer

Imaging and anatomy departments buying this sectional head deal directly with its maker. Jain Scientific Equipments Private Limited, whose trading name is **ScienceLab**, is the OEM (original equipment manufacturer) and produces the model at its own licensed factory at Saha, Ambala, Harya
