Description :

Human Male Reproductive System Model Set (Product Code: SLE/A/84) is a set of 4 plaque-mounted models that together illustrate the interior anatomy of the male reproductive tract. The urinary bladder, prostate gland and penis are sectioned longitudinally, and the testis is shownfrom 3 perspectives, from its position in the scrotum down to an enlarged dissection of its internal tubules. A numbered key identifies 25 structures. The set serves reproductive biology, urology, nursing and medical teaching, and is made by an anatomical models manufacturer, **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Set contents	4 plaque-mounted models
Mounting	Durable polymer bases
Size (each)	50 x 26 x 8 cm
Sectioned organs	Urinary bladder, prostate gland and penis, sectioned longitudinally
Testis views	In situ within a life-sized scrotum; life-sized longitudinal dissection; 2x life-sized dissection
Enlarged testis detail	Epididymis, seminiferous tubules, tunica albuginea and other significant structures
Key	Numbered key with 25 identified structures

Typical Use

Because the set is split across four plaques, a teacher can move from the big picture to fine detail in a logical sequence: first the sectioned bladder, prostate and penis to show the course of the urethra and the glands that open into it, then the testis in the scrotum, then its life-sized dissection, and finally the 2x enlargement where the seminiferous tubules and epididymis explain where sperm are produced and stored. The plaques can be laid flat on a bench or propped up for display.

Flat, wall-style mounting also makes the set practical for rotating practical stations, since each plaque can go to a different group with the numbered key. For colleges assembling a human biology model set, this pairs well with a pelvis model so students see the reproductive organs in relation to the bony pelvis.

Manufacturer

The set is manufactured by **Jain Scientific Equipments Private Limited**, the Ambala, Haryana company behind the **ScienceLab** brand. It is a registered MSME enterprise with manufacturing as its major activity (Udyam UDYAM-HR-01-0003714), and its overseas shipments go out under Importer-Exporter Code AAECJ8618A issued by the DGFT.
