Description :

Human Leg and Portion of Pelvis Model (Product Code: SLE/A/88) is a life-size lower limb, attached to part of the pelvis, that stands on a stand with base and can be rotated to view every side. Its surface muscles are removable, exposing the blood vessels and nerves that run through the limb, and the whole model is dissectible into 10 parts. It is intended for anatomy, physiotherapy, orthopaedic, sports medicine and nursing teaching, and comes from the anatomical models manufacturer **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Scale	Life size
Region	Leg with a portion of the pelvis
Movement	Rotatable
Dissectible into	10 parts
Removable layer	Surface muscles, for study of blood vessels and nerves
Mounting	On stand with base
Size	39 x 26 x 108 cm H

Typical Use

Lower-limb anatomy combines muscles, vessels and nerves in a small space, and a rotatable life-size model is the clearest way to show how they fit together. Teachers typically start with the intact limb to name the thigh, calf and gluteal muscles, then lift the surface muscles away to follow the main arteries, veins and nerves from the pelvis down towards the foot. Rotating the model on its stand lets the class see the front, back and sides without anyone handling the parts.

Physiotherapy and sports medicine tutors use it to point out where nerves are vulnerable to injury and how muscle groups act on the hip and knee. As a piece of biology lab equipment in India for medical and allied health colleges, it complements a skeleton by adding the soft tissue that bones alone cannot show.

Manufacturer

ScienceLab is the brand name used by **Jain Scientific Equipments Private Limited**, an Ambala, Haryana firm that makes this leg model along with many other anatomy and laboratory products for educational buyers. Our company profile has more about the company.
