**Product Name :**

Reagent Bottle, Narrow Mouth

**Product Code :**

SLE/GBO/09

# Description :

The **Reagent Bottle, Narrow Mouth** (Product Code: SLE/GBO/09) is a clear borosilicate glass storage bottle closed with a pressed flat stopper, used to keep stock solutions, distilled water and prepared liquid reagents on the laboratory shelf. Its narrow neck limits evaporation and gives a controlled pour, which is why this pattern is a staple of borosilicate glassware in India's school, college and research laboratories. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, in five capacities from 125 ml to 2000 ml.

## Specifications

| Parameter | Detail |
|---|---|
| Mouth | Narrow mouth |
| Closure | Pressed flat stopper |
| Material | Borosilicate glass |
| Colour | Clear |
| Heat resistance | Heat resistant |
| Chemical resistance | Chemical resistant |
| Capacities | 125 ml, 250 ml, 500 ml, 1000 ml, 2000 ml |

## Typical Use

A typical chemistry laboratory keeps its dilute acids, alkalis, salt solutions and indicator stocks in narrow-mouth reagent bottles. The 1000 ml and 2000 ml sizes are used in the preparation room for bulk stock, while 125 ml, 250 ml and 500 ml bottles are placed on student benches or reagent racks so that each group has its own supply. Clear glass lets staff see at once whether a solution has turned cloudy, changed colour or dropped to a low level.

Fill the bottles through a funnel to avoid wetting the neck, and wipe the neck before inserting the stopper. Label each bottle with the contents, concentration and date. Stoppers that stay in contact with strong alkali solutions can stick, so rinse spills from the neck promptly; a plastic-stoppered bottle may be more convenient for such solutions. Institutions stocking a new reagent shelf often buy all five sizes from one laboratory glassware supplier in India so that the bottles match.

## Manufacturer

ScienceLab is the brand name used by Jain Scientific Equipments Private Limited, a laboratory equipment maker based in Ambala, Haryana. The company produces glassware, apparatus and teaching aids for educational and scientific institutions and serves buyers in India and international markets. Company details are on the ScienceLab profile page.
