Description :

The **Bottle Brush** (Product Code: SLE/GBO/13) is a cleaning brush with white nylon bristles set on a metal handle, used to scrub the inside walls and base of laboratory bottles that a cloth or sponge cannot reach. Lab assistants use it to remove dried reagent films, deposits and residues from reagent, dropping and storage bottles before they are rinsed and reused. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab consumables supplier in India that also offers the bottles it is meant to clean.

Key Details

Parameter	Detail
Type	Bottle cleaning brush
Bristle material	Nylon
Bristle colour	White
Handle	Metal
Purpose	Cleaning bottles

Typical Use

After a bottle has been emptied, rinse it with tap water, add a little laboratory detergent solution, then insert the brush and work it up and down while turning it so the bristles sweep the shoulder, walls and base. Finish with several tap-water rinses followed by a distilled-water rinse, and leave the bottle upside down to drain. White bristles make it easy to see when residue is being lifted off and when the brush itself needs rinsing.

Do not force the brush into a neck that is narrower than its head, and avoid jabbing the metal handle tip against the glass base, which can scratch or crack it. Rinse the brush after each use, shake out the water and hang it to dry; replace it once the bristles splay or flatten. Schools ordering glassware from a lab glassware supplier in India often add a few brushes so that wash-up can start the day the bottles arrive.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, headquartered in Ambala, Haryana. The company supplies cleaning accessories such as this brush together with its laboratory glassware to buyers in India and international markets. Its vendor registration details are CIN U29309HR2020PTC087597 and GSTIN 06AAECJ8618A1ZT. See the company profile for more.
