Description :

Human Male Genital Organs Model (Product Code: SLE/A/96) is a life-size anatomical model of the male reproductive organs that separates into 5 parts, letting students see how the bladder, prostate, urethra, testes and spermatic cord connect. It is used for reproduction and urogenital anatomy lessons in senior-secondary biology classes, nursing schools and medical colleges, and comes from the anatomical models manufacturer **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its range of human anatomical models made in India.

Specifications

Parameter	Detail
Type	Anatomical model of the male genital organs
Scale	Life size
Dissection	Dissectible into 5 parts
Size	18 × 20 × 21 cm (H)
Mounting	On stand with base
Structures shown in fine detail	Penis, prostate, bladder, testes, spermatic cord, urethraand scrotum

Typical Use

Teachers use this model to trace the pathway shared by the urinary and reproductive systems in the male: with the parts separated, a class can follow the urethra from the bladder through the prostate and along the penis, then locate each testis within the scrotum and the spermatic cord running upward from it. It supports textbook chapters on human reproduction, nursing anatomy practicals and health-education talks where a three-dimensional object explains far more than a diagram.

Because it is life size, learners get a realistic sense of scale that flat charts cannot give. Many schools place it alongside a female counterpart as part of a human biology model set, so both systems can be compared in the same lesson. A practical tip: lay the 5 parts out in order on a tray while teaching and count them back onto the stand before the model goes into storage.

Manufacturer

This model comes from **Jain Scientific Equipments Private Limited**, a company based in Ambala, Haryana, that sells its laboratory and anatomy products under the **ScienceLab** name to schools, colleges and distributors in India and international markets. Read the company profile for background on the business and its product lines.
