**Product Name:** 

**Product Code:** 

Teltron Helmholtz Pair of Coils D

SLE/PHY/56

## **Description:**

Pair of Helmholtz coils for generating a uniform magnetic field perpendicular to the axis of the Teltron D series tubes. The maximum field strength enerated by the coils (~ 10 mT) is approximately 300 times weaker than that produced by an MRI machine (~ 3T), which are known to be safe for use by people with medical implants such as pacemakers. Allows the coils to be configured in the Helmholtz geometry or to produce magnetic fields aligned vertically, or coaxial, with respect to the tube axis.

Instructions included.

Specification:

Number of turns: 320

Max. continuous current: 1.0 A

Max. momentary current: 10 min @ 1.5 A; 3 min @ 2 A

**Connectors**: 4-mm sockets. **Effective impedance**: 6 ohm

Max. field strength: approx. 10 mT

Contact ScienceLab for your Educational School Science Lab Equipments. We are best school science lab equipments suppliers in india, school science lab instruments, school science lab instruments exporter, school science lab instruments manufacturer, school scientific equipments, science educational equipment.
