Product Name :

Advanced Fossil Collection

Product Code :

SLE/GG/13

Description :

Advanced Fossil Collection (Product Code: SLE/GG/13) is a comprehensive set of 30 fossils chosen as demonstration specimens of animal phyla and plants from the Paleozoic, Mesozoicand Cenozoic. With a descriptive key sheet and a geologic time chart, it lets senior school andcollege students connect each specimen to its group and its place in Earth's history. Thecollection is equally useful to geography, geology and biology departments, where it serves asone of the more detailed biology teaching aids for evolution topics. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as educational laboratory equipment inIndia.

Specifications

Parameter	Detail
Number of fossils	30
Specimen content	Demonstration specimens of animal phyla and plants
Geologic eras represented	Paleozoic, Mesozoic and Cenozoic
Reference material	Descriptive key sheet and geologic time chart
Supplied as	Complete fossil collection

Typical Use

A common approach is to give each group a handful of specimens and ask them to identify the phylum or plant group using the descriptive key sheet, then place each fossil on the geologic time chart. When the whole class combines its results, the chart shows how life changed from the Paleozoic through the Mesozoic to the Cenozoic — a strong visual for lessons on evolution, extinction events and the idea of index fossils used to date rock layers.

Because the set spans both animals and plants across three eras, it also supports comparative work in biology, such as tracing how body plans within a phylum persist or change over time. Handle specimens over a tray or cloth-covered bench, keep the key sheet with the collection and count the pieces back in after each session so all 30 stay together.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala in Haryana, supplies this collection as part of its earth science and geography range. Since fossils are natural specimens, the company supplies rather than manufactures them, and it serves institutions across India and in international markets. More about the business is on our profile page.

Related Geography Lab Equipment

These resources work well with the Advanced Fossil Collection in earth history lessons:

- General Fossil Collection — a smaller 15-fossil set for introductory classes or extra student stations.
- [illegible]ed
