Description :

Human Head Dissection Model (Product Code: SLE/A/127) is an about life-size dissectiblehead used to study the brain and the orbit together in anatomy, optometry, nursing andneuroscience classes. The right cerebral hemisphere, right cerebellar lobe and right eye areremovable, and the eye comes out with its extrinsic muscles, lacrimal gland, lacrimal duct andoptic nerve. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEManatomical models manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Dissectible human head model
Scale	About life size
Size (without base)	21 x 21 x 18 cm
Removable parts	Right cerebral hemisphere, right cerebellar lobe, right eye
Eye detail	Extrinsic muscles, lacrimal gland, lacrimal duct and optic nerve
Labelling	All significant structures numbered and referenced on the accompanying key
Mounting	Durable plastic base
Product code	SLE/A/127
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Human Head Dissection Model Used For?

This model is handy for teaching the visual pathway from front to back. Start by removing the right eye to show the extrinsic muscles that move it and the lacrimal gland and duct that keep it moist, then follow the optic nerve backwards. Lifting out the right cerebral hemisphere next reveals the deeper parts of the brain, and taking out the right cerebellar lobe shows what lies at the back of the skull.

With the key in hand, students can work through the numbered structures independently in a practical period, reassembling the parts when they finish. Optometry and ophthalmic assistant courses appreciate the removable eye with its surrounding structures, while general anatomy students gain a combined view of brain and orbit. Departments searching for eye model anatomy in India will find the head context here more useful than an isolated eyeball for some lessons.

OEM Manufacturer

The Human Head Dissection Model is an OEM (original equipment manufacturer) product of Jain Scientific Equipments Private Limited, trading as **ScienceLab**, made at the company's own licens
