Product Name :

Human Kidney, Nephron and Renal Corpuscle Model

Product Code :

SLE/A/143

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Human Kidney, Nephron and Renal Corpuscle Model (Product Code: SLE/A/143) is a plaque-mounted series of 3 greatly enlarged models used to teach renal physiology from organ tofiltering unit in medical, nursing, pharmacy and senior school programmes. It combines a 2 1/2×life-size dissection of the kidney and adrenal gland, a schematic nephron and a renal corpuscleon a plaque measuring 69 × 29 × 10 cm overall. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of school biology lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Format	Plaque-mounted series of 3 models
Overall size	69 × 29 × 10 cm
Scale	Greatly enlarged
Model 1	2 1/2× life-size dissection of the kidney and adrenal gland
Model 2	Schematic enlargement showing anatomical details of an individual nephron
Model 3	Renal corpuscle with Bowman's capsule, glomerulus and juxtaglomerular apparatus
Product code	SLE/A/143
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Kidney, Nephron and Renal Corpuscle Model Used For?

The three models on one plaque follow the order in which urine formation is usually taught. Lecturers begin with the dissected kidney, move to the nephron to explain how fluid is modified as it passes along the tubule, and finish at the renal corpuscle, where blood is filtered from the glomerulus into Bowman's capsule. The juxtaglomerular apparatus then gives a starting point for discussing how the kidney helps regulate blood pressure.

Because everything is fixed to one plaque, the full sequence stays together for display in a physiology laboratory or museum room and is quick to set up for a lecture. It is a strong addition to biology teaching aids in India for courses that examine the nephron in detail. Dust the plaque regularly and avoid propping it where it could slip.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known by its trading name ScienceLab, is the OEM (original equipment manufacturer) of this renal plaque series and makes it at its own licensed factor y it factor e answ
