Product Name :

Super Floating Magnets Set

Product Code :

SLE/MG/10

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Super Floating Magnets Set (Product Code: SLE/MG/10) is a floating-magnet demonstration set used to show magnetic repulsion, where like poles push magnets apart so they appear to hover, in school science lessons. It suits teachers who want a quick, visual way to show that magnetic force acts without contact, and it also works well as a science fair project kit in India. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India; contents are confirmed with each quotation.

Key Details

Parameter	Detail
Product type	Floating magnets demonstration set
Demonstrates	Magnetic repulsion between like poles; force acting without contact
Contents and sizes	Confirmed with your quotation; ask us before ordering
Product code	SLE/MG/10
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Floating Magnets Set Used For?

Floating magnets are one of the quickest ways to make an invisible force obvious. In a typical floating-magnet demonstration, ring magnets are placed on a vertical guide with like poles facing, so each magnet rests in mid-air above the one beneath it. Students can push a magnet down and feel the resistance grow as the gap closes, compare the spacing at the lower and upper ends of the stack, and turn a magnet over to watch repulsion change to attraction.

These observations lead naturally into discussion of balanced forces, since the magnetic push matches the weight of the magnets above. The same set can support a class investigation or a science fair display. Handle the magnets gently, as magnets can chip if allowed to snap together.

Supplier

The Super Floating Magnets Set is supplied by Jain Scientific Equipments Private Limited, the company that trades as ScienceLab in Ambala, Haryana, India. It sources the set for schools, science centres and dealers, and confirms the current contents of the set with every quotation so buyers know exactly what they will receive.

If you are building several demonstration stations, the set can be quoted together with loose ring magnets and other magnetism items. See our company profile for more about the business.
