Product Name :

Stackable Leads Yellow

Product Code :

SLE/PHY/66

Description :

Stackable Leads Yellow (Product Code: SLE/PHY/66) is a yellow 4 mm stackable lead used to pick out a separate branch, meter connection or signal line in a laboratory circuit, so it is never confused with the red and black supply leads. It is 500 mm long and stacks with other 4 mm leads on a shared terminal, keeping physics lab instruments clearly wired. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of physics lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Colour	Yellow
Connector	4 mm stackable lead
Length	500 mm
Product code	SLE/PHY/66
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are Yellow Stackable Leads Used For?

Once a circuit grows beyond a single loop, two colours are not enough. A yellow lead can mark the voltmeter connections across a component, the second branch of a parallel circuit, or the input signal to an oscilloscope or amplifier board, so a student tracing a fault always knows which wire belongs to which part of the diagram.

Teachers often agree a class rule — red to positive, black to negative, yellow for measurement or branch links — and write it into worksheets, which makes marking practical set-ups much quicker. As with any lead, inspect the plugs and insulation before use and coil leads loosely for storage rather than knotting them.

OEM Manufacturer

These yellow leads are made by Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597), which trades as ScienceLab and is their OEM (original equipment manufacturer). Manufacturing is carried out at its own licensed factory at Saha, Ambala, Haryana, India — premises at 449, HSIIDC Industrial Area covered by Factory Licence AMB-ONLINE-CHD-J-414. Schools, colleges, dealers and importers order factory-direct; see the ScienceLab profile for more.
